Developed by the same team of experts that perfected FOLIA™, the ALTO™ process has been refined since 2007 into a uniquely durable, eco-responsible and vibrant aluminum surface material for large-scale exterior applications.

Using a proprietary dye-sublimation process, we infuse powder-coated aluminum with high-resolution digital images, making ALTO™ ideal for large-scale public art, mural and building skin projects, multi-site civic projects and wayfinding and placemaking projects.

PUBLIC ART

A top material for reproducing digital art and paintings, collages, photographs and more, ALTO™ brings public art to life.

- MURALS
- OUTDOOR GALLERIES
- ARCHITECTURAL DECORATION
- MEMORIAL SITES & MONUMENTS

“ ALTO™ lent itself exceptionally well. I didn't know the colors would be so vivid and the details would be so sharp. It's a gamechanger for people who do digital art to be able to make it durable for outdoors. ”

Dina Fisher, Artist.

MURALS & FACADES

Sustainable and vibrant, ALTO™ gives designers and architects the freedom to apply bold colors and custom graphics to building surfaces.

- LARGE FORMAT MURALS
- CLADDING
- BUILDING ACCENTS
- FACADE DECORATION

“ Not only does the ALTO™ product hold up to the harshest weather conditions but SH provides one of the best warranties in the profession and you do not have to sacrifice beauty or design. I love the ALTO™ product. ”

Louise Griffin, Artist & Designer.

CITY & TRANSIT

ALTO™ offers customized, long-lasting solutions for multi-site civic projects that require easy maintenance and installation.

- TRANSIT STATIONS
- PARKS
- INSTITUTIONS
- TOURIST DISTRICTS

“ ALTO™ is very sturdy and its material strength can be advantageous when integrated into the construction of a node vs. being only the interpretive layer. So in terms of design we can get more creative. ”

Matthias Reinicke,
Principal Designer, Lime Design.

WAYFINDING & PLACEMAKING

For signage and graphic elements that enhance the spaces that matter, ALTO™ provides durable, lasting and easy to implement solutions.

- WAYFINDING SIGNAGE
- INTERPRETIVE PANELS
- GUEST EXPERIENCE
- DONOR RECOGNITION

“ I was completely impressed with the depth of colour, the texture, the precision and the durability. ALTO™ is the ultimate product for outdoor graphics. ”

Anikó Szabó, Graphic Designer.

Australian Walkabout, Santa Barbara Zoo, Santa Barbara, CA.

UNIQUELY ALTO™ THE SECRET IS IN THE DETAILS

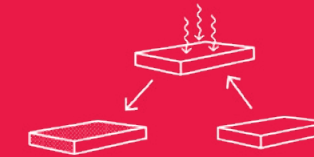

OVER THE EDGE

We sand, smooth and image wrap for a flawless look.

COLOR YOUR WORLD

A rainbow of colors matched for artists, designers and brands.

SUBLIMATION TRANSFORMED

Proprietary sublimation process results in incredible details and colors.

THE CREATIVE ELEMENT

Grade 5052 Aluminum is tough, recyclable and versatile.

ALTO™ Aluminum signs are made with Grade 5052 aluminum, an aluminum alloy known for its strong, ductile and light-weight profile. It is corrosion-resistant, specially in salt-water and marine atmospheres, and is not affected by weather extremes or high humidity.

ALTO™ performs well at any temperature but is at peak performance in cold climates. The power-coating process adds a further layer of protection against the elements and makes it ideal for long-term outdoor use.

Thanks to the quality of our process and durability of our powder coats, ALTO™ Aluminum panels are trusted by artists, designers, architects, fabricators, and organizations around the world.

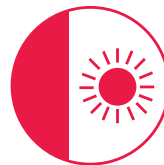

UV PROTECTION

GRAFFITI
RESISTANT

EASY
MAINTENANCE

FADE
RESISTANT

ECO FRIENDLY

As a material specially engineered to stay outdoors for years, ALTO™ resists rust, corrosion, delamination or fading. An ecologically sustainable product, ALTO™ uses zero-VOC and zero-TGIC powder coats, UV inks and eco-friendly aluminum, an infinitely recyclable material.
